

QuickGuide: Provincial Study Status & Expiry Date

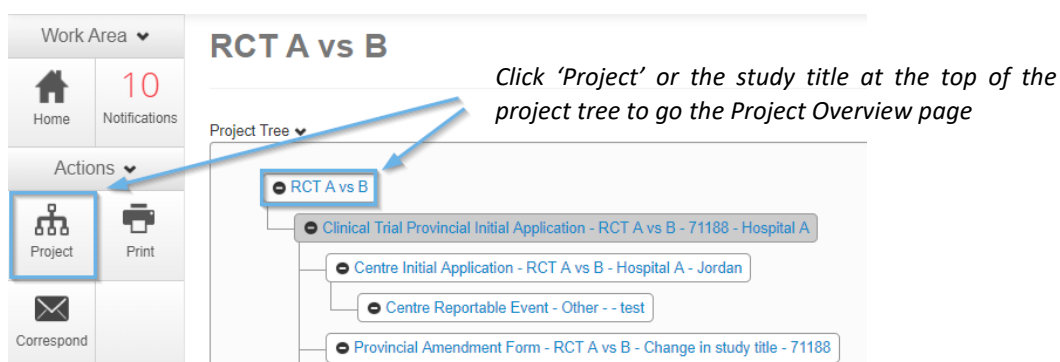

Study status describes the overall status of a study in CTO Stream and all participating sites in Ontario. The status for the study can be viewed in the 'Centres' tab while on the Project Overview page. The overall study status and ethics **Expiry Date** is displayed as the "Provincial" centre, in the Centres tab.

Immediately upon creation of the Provincial Initial Application (PIA), the Provincial status will update to "Pending" and the expiry date will show blank. After approval of the PIA, the **Study status** is automatically updated to "Active" and the expiry date selected by the REB of Record is displayed in the **Expiry Date** column of the Centres tab.

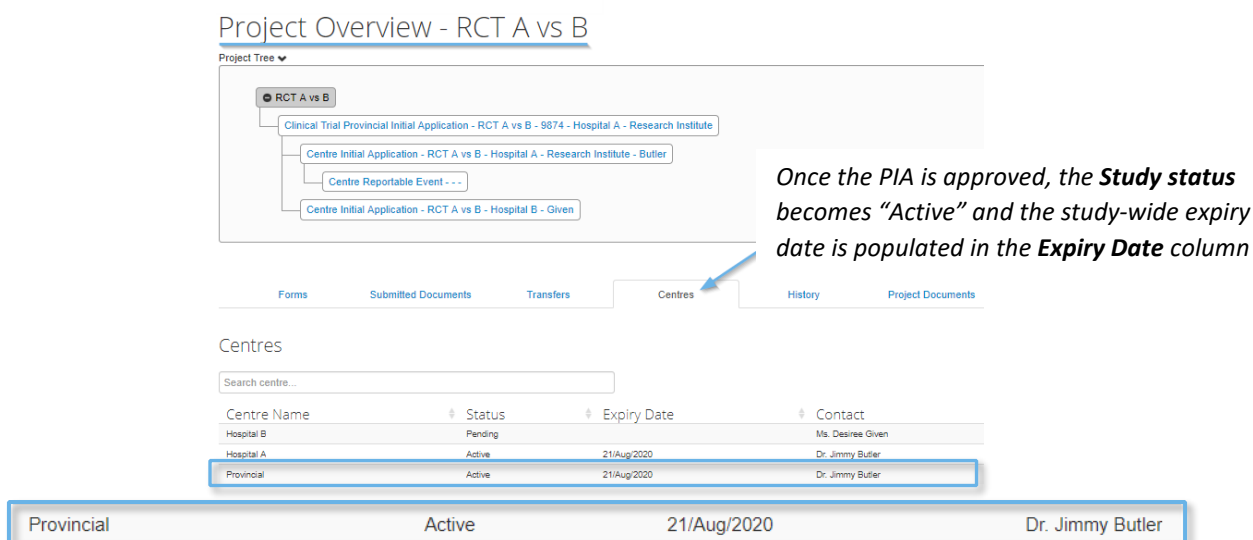

If there is ever a lapse in study-wide ethics approval, the Provincial study status (and the status of each participating site) is automatically updated to "Expired" on the expiry date.

To view the Centres Tab:

1. Go to the Project Overview by clicking the study title at the top of the project tree or by pressing the 'Project' button from the Actions Menu, while looking at the Project Tree.

2. Click the Centres tab (below the project tree) to view the overall study expiry date and status of each participating centre.
